

Project #1

For this assignment, you will write a program that implements a Caesar Cipher (encryption and decryption). A Caesar Cipher is a simple encryption method that encrypts a message by shifting each character either forward or backward a fixed number of positions in the alphabet. Must upload a Word or PDF file only. Justify the use of the programming language in your design section.

Example plain text and cipher text below.

plain: meet me after the toga party

cipher: PHHW PH DIWHU WKH WRJD SDUWB
